LEARNER ILP (INDIVIDUAL LEARNING PLAN)

The ILP is where a learner will go to record their plan for successfully completing their course. The various sections will allow them to record their **Goals**, their **Targets**, their **Strengths** and **areas they think need to be developed**. They will also be able set **SMART targets** which will enable them to record more specific task related targets they would like to achieve throughout their year.

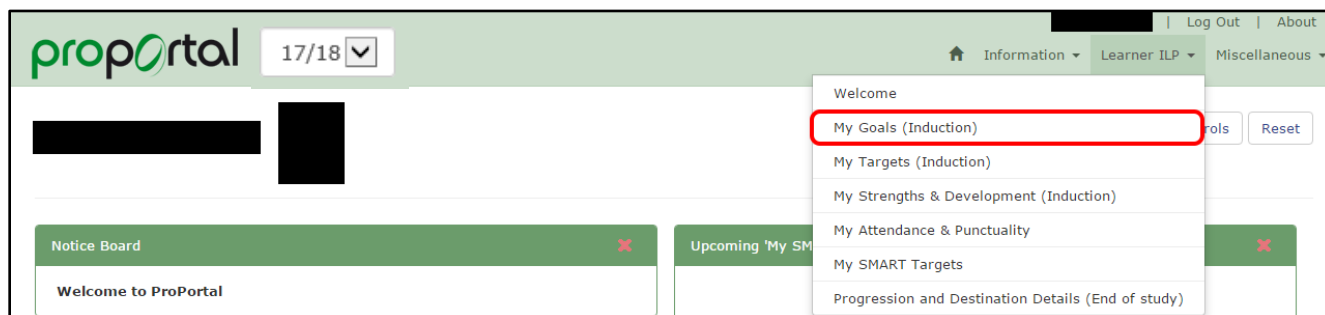

Other options in this area will also let you view their **Attendance and Punctuality**. It also includes an area for them to record their thoughts for **Progression and Destination** at the end of study giving them a head start on thinking of the future and making plans for the end of study.

The ILP is a feature that allows the learner to take responsibility for their own learning, attendance and punctuality and a means of monitoring their own performance. It is also a place where you, the parent can come in and view your son or daughter's progress and get an overview of how they are taking responsibility for their own learning and progress. ILPs are used by the teachers to get to know their students, and to assist them with planning and progression setting clear targets and goals for achievement.

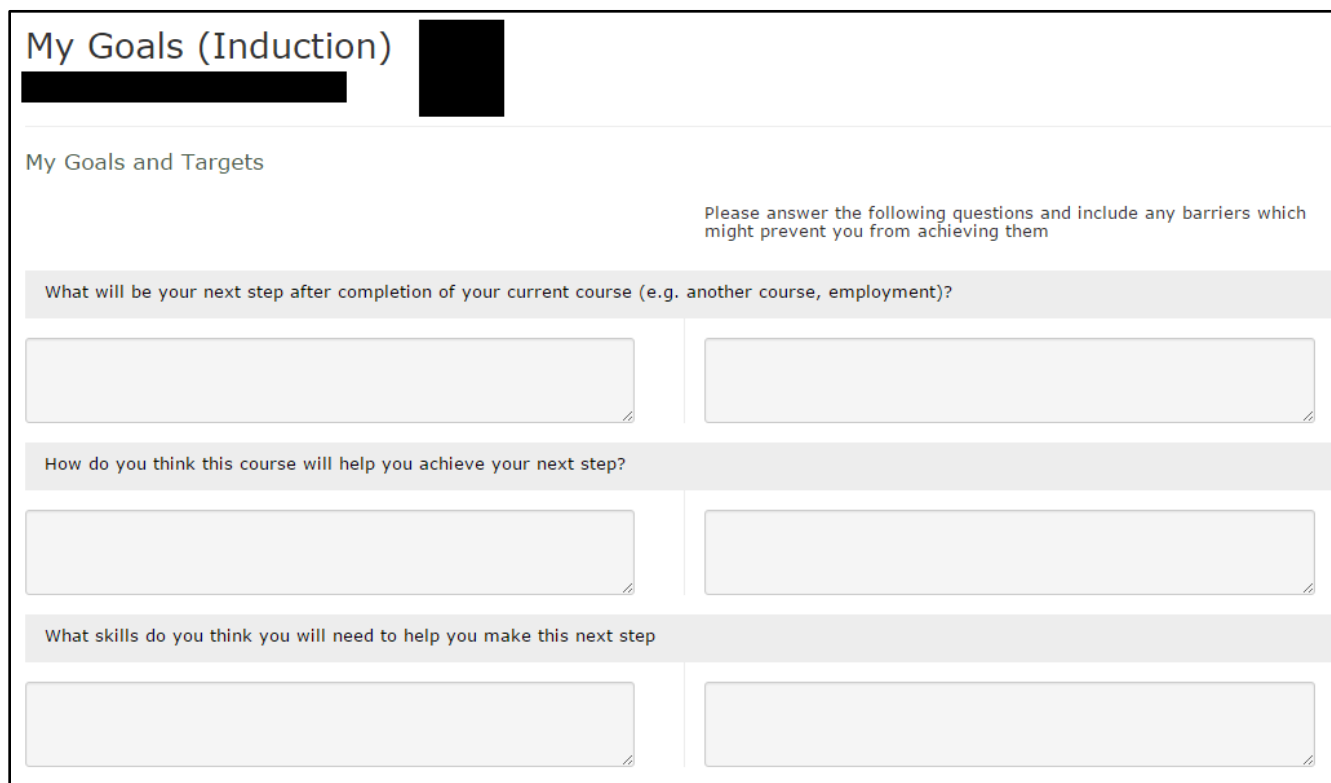

MY GOALS

In this part of the ILP learners will answer a few questions which will make them think about why they are on this particular course, what they hope to achieve at the end of it and what barriers they think they will face. This information could help the learner focus on what they need to do and help the teacher guide the learner appropriately. This information could help the parent plan for the future with their son or daughter. Both teacher and parent may use this information to help overcome any barriers identified by the learner.

To access your son or daughter's goals, click the 'My Goals' option in the Learner ILP drop down.

The 'My Goals' section looks like this:

- Question 1: 'What will be your next step after completion of your current course (e.g. another course, employment)?'
- Question 2: 'How do you think this course will help you achieve your next step?'
- Question 3: 'What skills do you think you will need to help you make this next step'
